3	Indices and tables	7

Contents:

1.1 Setup

1.1.1 Installation

Pip install cash2io.

1.1.2 Settings

1.1.3 Rules

The screenshot shows the 'cash2io' web interface. The browser address bar displays 'myDevice:8080/rules'. The navigation menu includes 'cash2io', 'Settings', 'Rules', and 'Docs'. A 'BETA' badge is visible in the top right. The main content area features a status bar with 'Online' and 'Idle' indicators, and a 'Tx last trigger' field containing a long hexadecimal string. Below this is the 'Rules' section, which explains that multiple rules can be defined. It includes an 'Apply changes' button and an 'Add Rule' button. The 'Rule #1' configuration form is shown, with a 'Delete Rule' button. The form fields are:

- Address:** qp3mwn3wafmehwxjydm25v67e3gsryhfcxumetzut8 (Currency: BCH)
- Amount:** 5 (Currency: BCH)
- Currency:** BCH
- Comparison:** < below (radio buttons for = equal, > above, < below)
- Command:** GIO.output(23,GIO.HIGH);time.sleep(10);GIO.output(23,GIO.LOW)

 A 'Test' button is located at the bottom of the form.

- Define rules

2.1 Overview

2.1.1 What is cash2io?

Cash2io

- The cash2io switch does not hold any money on it and is therefore not prone to theft.

CHAPTER 3

Indices and tables

- genindex
- modindex
- search
